

Djin Needle: Southwest Face

Approach: Routes A through D are on a small face reached by scrambling up the northwest side of the Djin and crossing to the south side through a notch just left of the summit face. The top of the rock can be reached by climbing up the north side.

Routes E and F are reached by hiking down the gully between the Magician and Djin.

Descent: For routes A through D, downclimb the north side from the summit.

NOTE: The precise lines of routes A through D are not known. The lines shown on the topo are best guesses based on the Moser, Vernon and Paul guidebook information.
